

# 3 Ways to be a Salt Smart Citizen

The use of salt allows us to safely continue our daily activities in the winter. However, large amounts of salt can have negative impacts on human health and our environment. Here are three easy ways you can reduce the amount of salt that enters our streams.

## 1. Shovel Right Away

Shovel driveways and sidewalks before snow melts and turns to ice.

## 2. Use Less

A 12-oz mug holds enough salt to treat 10 sidewalk squares or a 20-foot driveway.

## 3. Sweep and Reuse

Sweep, collect, and properly store excess salt for reuse.
